The cable gland with hygienic design made from high-grade stainless steel with NPT thread is suitable for an extremely wide variety of applications especially the food and pharmaceutical industries. The material and shape meet the high requirements of these industries. The smooth design minimizes the accumulation of moisture, dust, contamination or food residue.

The cable gland also offers great benefits for other applications, where the ambient conditions are harsh, such as those sited offshore. The compact design, the place saving shape and the big clamping range simplify the installation.

The SKINTOP® INOX SC NPT is especially designed for copper-screened cables and is used to achieve a low-resistance screen contact.
