# ÖLFLEX® CHAIN 809 SC CY

# **Application**

ÖLFLEX® CHAIN 809 SC CY are screened high-flexible PVC single-core cables designed for the European, North American and Canadian market, for flexible use and fixed installation under light to medium mechanical load conditions. They are also suitable for use in dry, damp or wet areas. They are suitable for outdoor use if the indicated temperature range is observed. They are largely resistant to acids, alkalis and certain oils at room temperature. They are especially suitable for basic requirements (Basic Line) in power chains and in permanently moved machine parts. They are suitable for linear, automated movements. The maximum tensile load is 15 N/mm² of conductor cross-section during installation and operation. Compulsory guidance is not permitted. The screening braid protects against interference from electrical fields.

Application range:

Power chains or moving machine parts, for wiring of electric and electronic equipment in switch cabinets, specially designed for power circuits of servo motors driven by frequency converters, test systems in the automotive industry, vehicles and stationary fuel cell systems. This cable is suitable for torsion application in wind turbines (WTG). The torsional load is limited to applications, as they typically occur in the loop of a wind turbine.

PVC sheathed cables for external interconnection or internal wiring of electronic equipment. USE according to UL: USE according to cRU: I A/B and II A/B. Cables for internal or external interconnection with or without mechanical stress.

# Design

acc. to UL AWM Style 10107, CSA C22.2 No. 210-15 Design

based on EN 50525-1 resp. VDE 0285-525-1

UL AWM Style 10107 (File No. E63634) Certification

cRU AWM I A/B, II A/B (File No. E63634)

Conductor fine wire strands of bare copper acc. to IEC 60228 resp. VDE 0295, Class 5

PVC compound (UL/CSA 90° C rating) Insulation

Core identification code black

Screen braid of tinned copper, coverage = 85% (nominal value)

Outer sheath PVC compound (UL/CSA 90° C rating)

colour: black, similar RAL 9005

# Electrical properties at 20°C

Nominal voltage IEC U<sub>0</sub> /U: 600 / 1000 V

UL /CSA: 600 V

2500 V AC Test voltage

# Mechanical and thermal properties

Minimum bending radius 10 x cable diameter flexing:

> fixed installation: 4 x cable diameter

Temperature range flexing (VDE): 0 °C up to +70 °C max. conductor temp.

flexing (UL/CSA): 0 °C up to +90 °C max. conductor temp. fixed installation (VDE): -40 °C up to +80 °C max. conductor temp. Fixed installation(UL/CSA): up to +90 °C max. conductor temp.

Bending cycles and power chain

Torsional stress

See Selection Table A2-1 in the appendix of our online catalogue

operation parameters For use in power chains: Please comply with assembly guideline Appendix T3

> TW-0 (5000 cycles at  $\geq +5$ °C) TW-1 (2000 cycles at ≥ -20°C)

± 150 °/m at 1 revolution per minute

flame retardant in acc. with IEC 60332-1-2 resp. VDE 0482-332-1-2 Flammability

UL: Vertical flame test VW-1, FT2

CSA: FT1

**UV** resistance acc. to EN 50525-1 (VDE 0285-525-1) cable with black sheath are suitable

for permanent outdoor use.

acc. to EN 50618 resp. VDE 0283-618 acc. to EN 50620 resp. VDE 0285-620

acc. to EN ISO 4892-2-2013, method A (change of colour allowed)

Oil resistance TM54 acc. to DIN EN 50290-2-22 resp. VDE 0819-102

Tests acc. to IEC 60811 resp. VDE 0473-811, EN 50395, EN 50396

UL 1581 und CSA C22.2

General requirements These cables are conform to the EU-Directives 2014/35/EU (Low Voltage Directive).

**Environmental information** These cables meet the substance-specific requirements of the EU Directive 2011/65/EU (RoHS).
